RELEASE IN FULL

HUL-A-952

2003

~~SECRET~~/RYBAT/PBSUCCESS

30 May 1954

Chief of Station, Guatemala

LINCOLN

Operational
CALLIGERIS Organization Assets

REF: HUL-A-953

1. At the time this dispatch is being written, the effect of the events reported in GUAT 705 cannot be estimated. It had been LINCOLN's intention to have CLOWER discuss the substance of this dispatch with ESCOBILLA, SEMANTIC and SECANT. Whether this will be possible depends on events and on your discretion. In any case, we are forwarding with this dispatch certain information on the CALLIGERIS complex in ADAM, with the request that you attempt to check it by whatever means are available.
2. The CALLIGERIS assets in ADAM are headed by SEMANTIC, who has both the overall responsibility and direct responsibility for the civilian organization. SECANT, under SEMANTIC, directs the effort within the garrisons. Under SEMANTIC and SECANT, there operate ADAM X, ADAM Y and ADAM Z. Again, under them are the four ADAM 1's (A, B, C, D) with their staffs. The ADAM 3's (A, B, C, D) operate directly under SEMANTIC.
3. ADAM STAR's are presently arriving. Four of them will come to ADAM, each one charged with contacting one ADAM 1 and one ADAM 3. The ADAM STARS are to give instructions, transmit plans, firm up organization and bring the various complexes to a final state of readiness.
4. As previously stated, LINCOLN would appreciate whatever check can be made on the survival, motivation, effectiveness and magnitude of these assets. A continuous process of testing, probing and developing these assets has been going on since the beginning of PBSUCCESS and now, in the light of recent events, this process must be pursued as effectively as possible. Some of the assets may be arrested; we would like to be informed. The reliability of others may be verifiable through Station files and independent assets of the Station. The magnitude of other assets,

particular conditions favoring or hindering their operation, etc., may be information procurable through various Station operations or observations. If possible and secure, of course, a review of the assets with SEMANTIC and SECANT would be the most profitable.

5. The sensitivity of this information cannot be overemphasized. LINCOLN is fully confident that the Station will take all appropriate precautions for its safeguarding from compromise.

6. Attachment 1 to this dispatch is a list of all new cryptos used. The true identities, correspondingly numbered, are given in the Reference dispatch.

7. Attachment 2 to this dispatch is a diagram of the claimed CALLIGERIS assets. All the ADAM 3's claim certain numbers of followers; these numbers are not supplied with this dispatch so that the Station check on such numbers of followers may be completely objective.

8. Cable reports on the probing of these assets will be appreciated. Details should be pouched at the earliest opportunity.
